EU regulations require a declaration of specified food allergens in the labelling of food stuffs in which they are present. This includes derivatives of the food allergens unless specifically exempted.  
 Atkins and Potts minimises the risk of its products being accidentally damaged or contaminated with non declared allergens through risk assessment, segregation, good handling practises from our suppliers and through storage, production and distribution.  
 However, the risk of adventitious contamination is a possibility in the supply from field to factory, and whilst unquantifiable but extremely small, cannot be eliminated.
